Savannah Cabinetry - Custom Capabilities

If standard options do not meet project requirements, Savannah Cabinetry offers an extensive range of alternatives. Nearly any cabinet style or finish can be accommodated.

Our team collaborates directly with clients to:

- ❖ Address project specific concerns
- ❖ Understand design goals and functional needs
- ❖ Implement custom solutions that align with specifications

Savannah Cabinetry is committed to delivering products that fit your requirements and consistently meet or exceed expectations.

Please Note: Product details are subject to change without prior notice. This printed spec book may not include the most recent updates. For the latest specifications and available modification options, please refer to our digital spec book at www.savannahcabinets.com.

- ❖ Five-Piece Drawer Front Construction
- ❖ Solid Wood Door with MDF Veneer Center
- ❖ Solid Wood Dovetailed Drawers
- ❖ 3/4" Adjustable Plywood Shelves
- ❖ Concealed 6-Way Adjustable Soft Close Hinges
- ❖ 3D Undermount Soft Close Glides
- ❖ Glass Door Option is Not Available in Verona Profiles

FEATURES

Plywood

FEATURES

1. Face Frames

Face frames are constructed from $\frac{3}{4}$ " x $1\frac{1}{2}$ " solid wood using mortise and tenon joinery, reinforced with both adhesive and fasteners for structural integrity. A dovetail groove on the rear side of the frame interlocks with the cabinet sides, ensuring precise alignment.

All face frames are engineered so that the interior top edge aligns flush with the bottom panel of both base and wall cabinets, allowing for consistent box-to-frame integration.

2. Cabinet Sides, Backs, Tops & Bottoms

Cabinet sides, backs, tops, and bottoms are constructed from $\frac{1}{2}$ " thick veneered plywood with a natural finish on both interior and exterior surfaces.

Side panels are securely dovetail-jointed into the face frame, while back panels utilize rabbet joints reinforced with glue, staples, and screws to ensure a rigid and square cabinet box structure.

Note: A $\frac{1}{4}$ " matching door color plywood panel is required on all exposed cabinet sides, except on vanity and oven cabinets.

Note: Aurora Pearl White cabinets feature matching exteriors with natural-finished interiors.

Additionally, all wall cabinets with glass doors include interior finishes that match the door color for a cohesive look.

3. Toe Kicks

Toe kicks are constructed from $\frac{1}{2}$ " thick, $4\frac{1}{2}$ " tall, veneered plywood for durability and structural support.

4. Adjustable Shelves

Adjustable shelves are constructed from $\frac{3}{4}$ " thick veneered plywood and edge-banded with matching wood tape.

Shelf depths by cabinet type:

- Base cabinets: 15" adjustable shelf (standard depth)
- Wall cabinets: 10 $\frac{1}{4}$ " adjustable shelves
- Pantry cabinets: 22 $\frac{1}{4}$ " adjustable shelves

5. Shelf Clips

Shelf clips feature a 6.8mm bore with a fluted plastic stem measuring 2" in length and include a self-locking mechanism for secure placement.

Shelves are adjustable in 2 $\frac{1}{2}$ " increments for flexible interior configuration.

FEATURES

6. Doors & Drawer Fronts

Doors are constructed from $\frac{3}{4}$ " solid wood frames with an MDF veneered center panel for stability and a smooth finish.

7. Hinges

Hinges are fully concealed, soft-closing, and feature 6-way adjustability with a 110° opening angle for precise alignment and smooth operation.

Note: Hinges for Lazy Susan and Easy Reach cabinets do not feature the soft close mechanism.

8. Drawer Boxes

Drawer boxes feature $\frac{5}{8}$ " thick sides and solid wood ends, paired with $\frac{3}{8}$ " plywood bottoms. The dovetail joints provide strength and durability, with bottoms recessed $\frac{1}{2}$ " and routed $\frac{1}{4}$ " into the sides and ends.

Bottom panels are securely glued and nailed to the drawer sides. The interior drawer height measures 3".

9. Drawer Glides

Heavy-duty, full-extension ball-bearing drawer glides featuring integrated soft-close mechanisms for smooth, quiet operation and enhanced load capacity.

10. Panel Beams

Panel beams measure $2\frac{1}{2}$ " x $\frac{1}{2}$ " and are securely fastened into a dovetail groove at the top of the base cabinet, creating a sturdy, straight, and integrated side structure.

11. Base Corner Brackets

Base corner brackets are made of heavy-gauge metal, designed to provide reinforced structural support and ensure long-lasting durability in cabinet assembly.

12. Hanging Strips

Hanging strips are fabricated from $\frac{3}{4}$ " x $1\frac{1}{4}$ " solid hardwood to provide robust and dependable support for cabinet installation.
